Defining knowledge translation - PubMed Central (PMC)

Formally, knowledge translation is defined by the Canadian Institutes of Health Research as a dynamic and iterative process that includes the synthesis, dissemination, exchange and ethically sound application of knowledge to improve health, provide more effective health services and products, and strengthen the health care system. This definition has been adapted by others, including the [Introduction - Knowledge Translation in Health Care](#) ...

These theories focus on deliberately engineering change in health care systems and groups. A group may start the knowledge to action process by determining the evidence to practice gap. The knowledge relevant to this problem is then adapted to the local context. Adapting the knowledge to local context extends to assessing barriers and facilitators to knowledge implementation. The action cycle [Knowledge translation in health care: a concept analysis](#)

Knowledge Translation in Health Care: Moving from Evidence ...

The Sharon Straus, Jacqueline Tetroe, Ian Graham edited, 'Knowledge translation in health care' is a comprehensive over view of what is often the complex and fraught area of translating theories within the health system into practical management policies. Using several experts in the field to offer their own perspective, the editors drive the subject into areas which those involved professionally
