general equilibrium value of life, for 96 countries for 1990 and 2000. The dynastic general equilibrium value of life turns out sizable and makes the full income show convergence better than the GDP per capita. However, the gains in convergence are small, less than half of those Life Expectancy and Income Convergence in the World: A ...

There is world-wide convergence in life expectancy, despite little convergence in GDP per capita. If one values longer life much more than material happiness, the world living standards may this have already converged substantially. This paper introduces the concept of the dynastic general equilibrium value of life to measure welfare gains from the increase in life expectancy. A calibration study finds sizable welfare gains, but these gains hardly mitigate the large inequality among Life Expectancy and Income Convergence in the World : A ...
