We show how a liquidity shock to the cash lender may propagate as a solvency shock via

**Macroprudential Regulation Under Repo Funding : IMF ...**

Albeit a cost-effective response of the cash lender to a liquidity shock, liquidity hoarding may lead to the bankruptcy of its repo counterparties triggering contagion across asset classes. To buttress the resilience of the financial system, we lay out a menu of macroprudential policies that deactivate this channel of financial contagion.

**Macroprudential Regulation Under Repo Funding - IMF**

Summary: The use of collateral has become one of the most widespread risk mitigation techniques. While it brings stabilizing effects to the individual lender we argue that it may exacerbate systemic risk through margin call activation.
