Like many social psychologists of my generation, I first encountered *The Psychology of Interpersonal Relations* some years prior to its publication. A dittoed early draft of the manuscript had been widely circulated and, in those pre-Xerox days, a graduate student thought to be deserving and (more

In "The Psychology of Interpersonal Relations," Heider argued that social perception follows many of the same rules of physical object perception, and that the organization found in object perception is also found in social perception. Because biases in object perception sometimes lead to errors (e.g., optical illusions), one might expect to find that biases in social perception likewise lead
